

## INDEX TO TEXT AND NOTES

All references are to sections of the Text (T) or to the correspondingly numbered Notes (N).

The index is in three parts. Index I contains proper names and subjects. Proper names which appear in the Latin text are in capitals; those referring to the notes alone, are in lower case. Subjects, e.g. *Aezarium*, whether in text or notes, are in italics. If there is a Text entry (T), the corresponding Note (N) has not been listed but should always be consulted. Some names which appear in their adjectival form in the Latin have been entered in the index under the appropriate nominal form. Not indexed are Roma, Italia, Augustus (except as a *cognomen*), some persons mentioned *en passant* in the notes, and people whose names are in reality dates.

Index II lists the references in the notes to passages of Dio Cassius, Tacitus, Velleius Paternulus, and Suetonius' other imperial biographies.

Index III is intended to be a complete epigraphic index to the notes, and it is here that Augustus' *Res Gestae* is to be found.
